

SAMPLE DELIVERABLE

# Monthly orthomosaic map set

Louisville VA Medical Center | flown every month for Walsh Construction since the summer of 2024

Five of the monthly maps, each stitched from hundreds of overlapping aerial photos captured in a single morning.

# June 2024

Structural steel and early sitework across the 40-acre campus.

# January 2025

The main structures topped out through a Kentucky winter.

# September 2025

Roofing under way and site utilities taking shape.

# March 2026

Paving, parking, and exterior finishes closing in.

# July 2026

Finished roofs, roads, and landscaping - two years after the first flight.

## WHAT YOU RECEIVE

# A progress set you can actually use

- The same repeatable angles and elevations every visit
- Weekly, monthly, milestone or one-time schedules
- High-resolution stills, color-corrected and straightened
- Optional progress video, time-lapse and orthomosaic maps
- Edited files delivered by download link after each visit
- Flights rescheduled to the next safe window when weather rules out a visit
- Before-and-after comparison visuals for owner and investor updates
- Ground-level photos and video on the same visit when you need them

## Put your build on a schedule

Send the project address, the start date and how often you want updates.
